

CAS No 7440-44-0 Granulated Coal Based Activated Carbon For Purification Systems

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 7440-44-0
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **7440-44-0 Coal Based Activated Carbon, Granulated Coal Based Activated Carbon, Purification Granulated Activated Carbon**

Product Description

Activated Carbon Pellets / Granulated Carbon / Purification Systems / Black

Activated Carbon Media is a type of porous carbon material that is widely used as an adsorbent in various industrial and environmental applications. It is produced by heating a carbon-rich organic material in the absence of oxygen to create charcoal, which is then activated through exposure to high temperatures or chemicals to increase its porosity and surface area.

Activated carbon media is commonly used in water treatment systems to remove impurities such as chlorine, organic compounds, and heavy metals. It is also used in air purification systems to remove odors, pollutants, and volatile organic compounds from the air.

In industrial processes, activated carbon media is used for gas separation, solvent recovery, and as a filter aid in various chemical processes.
