Product Description

Activated Carbon Powder / Industrial Processes / For Sewage Treatment / Carbon

Activated Carbon Powder is a finely ground activated carbon with high surface area and high porosity, which is an effective adsorbent for removing impurities from liquids and gases.

It is commonly used in water treatment systems, air purification systems and industrial processes such as gas separation and solvent recovery.

Activated Carbon Powder is commonly used in water treatment systems to remove organic compounds, chlorine and other impurities from drinking water.

It is also used in air purification systems to remove odours, pollutants and volatile organic compounds from the air.
