

64365-11-3 Adsorbent Black Activated Carbon Pellets For Gas Purification

Basic Information

- Place of Origin:
- Datong, Shanxi, China
- Brand Name:
- Minimum Order Quantity: 1 Ton
- Packaging Details:
- Payment Terms:
- Supply Ability:
- Xinyue
- 500kg/bag , 25kg/bag
- T/T
- 100,000 Ton/Tons per Year

Product Specification

	Adsorbent Activated Carbon Pellets, Black Activated Carbon For Gas Purification
 Highlight: 	64365-11-3 Activated Carbon Pellets,
• Hardness:	>95%
Package:	500kg/bag Or 25kg/bag
 EINECS No: 	264-846-4
Moisture:	<5%
• Ash:	<12
• Type:	Adsorbent
Purity:	99.99%
CAS No:	64365-11-3

Product Description

Activated Charcoal Pellets / Water Treatment Chemical / Gas Purification

Activated Charcoal Pellets are a form of activated carbon that has been compressed into small, uniform pellets. These pellets are made from powdered activated charcoal, which is pressed and formed into a solid shape using a binder or other agents.

Activated charcoal pellets are commonly used in water treatment systems, air purification systems, and industrial processes such as gas separation and solvent recovery.

One advantage of activated charcoal pellets is their ability to be regenerated, or reactivated, after becoming saturated with impurities. This involves heating the pellets to a high temperature to remove the adsorbed impurities, allowing the pellets to be reused.
