## Product Description

Powder Activated Carbon / Chemical / Water Treatment / Filter Contaminants

**Application Areas:** Powder Activated Carbon is used in a wide range of applications, including but not limited to water treatment, food processing, pharmaceutical manufacturing, and environmental protection. In water treatment, it is used to remove organic impurities, chlorine and improve the taste and odour of water.

In the food industry, especially in sugar production and fat processing, powder activated carbon is used for decolourisation and removal of unwanted impurities. In the environmental field, it is widely used in exhaust gas treatment and wastewater treatment to help control and reduce the emission of various pollutants.
