

Activated Carbon Activated Charcoal Media Adsorbent Gas Purification

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 7440-44-0
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Activated Charcoal Media Gas Purification,
Activated Charcoal Media Adsorbent,
Activated Carbon Activated Charcoal**

Product Description

Activated Charcoal Wholesale / Activated Carbon Media / Gas Purification

The main advantages and areas of application of using activated carbon for air purification are described below:

- (1) Highly efficient adsorption capacity: activated carbon has a highly developed microporous structure, which results in a very large surface area, thus enabling it to effectively adsorb a wide range of pollutants in the air. These micropores adsorb and immobilise harmful molecules in the air, preventing them from entering the respiratory system.
- (2) Wide range of applications: Activated carbon is widely used in household air purifiers, industrial emission control and air purification systems in public places. It can effectively remove smoke, dust, odour and harmful gases from the air and improve air quality.
- (3) Affordable Option: activated carbon is usually less costly and readily available compared to other air purification technologies on the market. This is particularly important for industrial applications that require large quantities of air purifying materials.
