Product Description

Coal Based Crushed Activated carbon / Coal Activated Carbon / Clarification

Application areas: Coal-based crushed activated carbon is widely used in water treatment, gas purification and industrial waste gas treatment due to its unique pore structure and adsorption properties.

In water treatment, it can effectively remove harmful substances in water, such as heavy metals and organic pollutants, and improve the safety of water quality.

In gas purification, coal-based crushed activated carbon can be used in the purification of industrial emissions, effectively removing harmful gases and odors to protect environmental health.
