Product Description

Coal Based Activated Carbon Pellets / Efficient Pollutant Removal

1. Coal based activated carbon pellets are a form of activated carbon that is produced from coal and processed into small, uniform pellets.
2. These pellets have a high surface area and are highly porous, making them effective for adsorption and filtration applications.
3. Wastewater Treatment: Contributes to the remediation of industrial and municipal wastewater by adsorbing harmful substances, enabling water reuse and protecting aquatic ecosystems.
4. Industrial Detoxification: Plays a crucial role in controlling emissions from industrial processes, aiding companies in meeting environmental compliance standards.
