

Coal Based Powder Activated Carbon Versatile Purification Adsorption Capacity

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Coal Based Powder Activated Carbon, Powder Activated Carbon Purification**

Product Description

Coal-Based Powder Activated Carbon / Versatile Purification / Adsorption Capacity

1. Coal-based powder activated carbon is a type of activated carbon that is produced from coal. This type of activated carbon is commonly used in water treatment and air purification systems due to its high adsorption capacity and ability to remove impurities such as organic compounds, heavy metals, and odors. It is also used in industrial processes such as gas separation and solvent recovery.
2. Coal-based charcoal powder activated carbon is a versatile and effective adsorbent material with a wide range of applications in various industries.
3. Wastewater Treatment: Contributes to the remediation of industrial and municipal wastewater by adsorbing harmful substances, enabling water reuse and protecting aquatic ecosystems.
4. Industrial Detoxification: Plays a crucial role in controlling emissions from industrial processes, aiding companies in meeting environmental compliance standards.
