

Coal Fueled Activated Carbon Charcoal Pellets Acid Alkali Resistant

Basic Information

Place of Origin: Datong, Shanxi, China

Brand Name: XinyueMinimum Order Quantity: 1 Ton

Packaging Details: 500kg/bag, 25kg/bag

• Payment Terms: T/T

• Supply Ability: 100,000 Ton/Tons per Year

Product Specification

CAS No: 64365-11-3
Purity: 99.99%
Type: Adsorbent
Iodine Number: 800-1200mg/g

Ash: <12Moisture: <5%EINECS No: 264-846-4

• Package: 500kg/bag Or 25kg/bag

• Hardness: >95%

Highlight: Activated Carbon Charcoal Pellets Acid

Resistant

, Coal Fueled Activated Carbon Charcoal Pellets

Product Description

Coal Fueled Active Charcoal / Acids And Alkalis / Wide Adaptability

Highly developed pore structure: With high specific surface area, it can provide a large number of adsorption sites. Diversified pore structure, including micropores, mesopores and macropores, suitable for a wide range of adsorption needs.

High mechanical strength: Resistant to pressure and abrasion, easy to use in different environments for a long time and reduce

Suitable for applications requiring fixed bed or fluid bed applications.

High regeneration capacity:Can be regenerated several times by thermal regeneration or other methods to reduce long-term

regeneration process can restore most of the original adsorption performance.

Wide Adaptability:Can work effectively in a wide pH range, suitable for many different application environments.Resistant to acids and alkalis, suitable for harsh conditions in chemical processes.
