## Product Description

Wood Powdered Activated Carbon / Wood Activated Carbon Powders / Water Purification

It is a porous adsorbent material, made from wood, with a very high surface area and adsorption capacity. This activated carbon is usually found in powder form, and its small particle size provides a larger surface area, which enhances its adsorption rate and efficiency.

Applications:

**Water treatment:** widely used in drinking water and wastewater treatment, effectively removing chlorine, heavy metals, organic matter and harmful gases in water.

**Food Processing:** Used in the processing of food and beverage for decolorization, deodorization and improvement of taste.

**Air purification:** used as filter material for air purifier, adsorbing harmful gases and odors in the air, such as formaldehyde and VOCs.

**Pharmaceutical use:** used in the drug manufacturing process for purification and removal of impurities, as well as in the treatment of certain symptoms of poisoning as an adsorbent.

**Cosmetic Industry:** Used in the manufacture of cosmetics to help improve the color and texture of the product.
