Product Description

Wood Based Crushed Activated Carbon / Remove Harmful Substances

In appearance, wood powdered activated carbon appears as a fine black powder. Its fine particle size enables it to provide a larger surface area and more active points in its application.

Due to its porous structure, wood powdered activated carbon has a very high specific surface area, which enables it to effectively adsorb a large number of pollutants.

Water treatment: used in sugar, pharmaceutical, beverage and other industries for water purification treatment, can effectively remove the color, taste and harmful substances in water.

Food processing: used for decentralization and purification of food additives, seasonings, etc. to ensure food safety and improve product quality.
