## Product Description

Wood Sourced Active Carbon / Environmentally Friendly Wood Activated Carbon Pellets

High adsorption efficiency: designed for environmental contaminants, providing more effective contaminant capture.

Wide range of applicability: Can be used in a variety of environmental applications, including water treatment facilities, exhaust gas treatment systems and chemical spill response.

Customization options: Pore structure and surface properties can be adjusted to target specific pollutants for specific application needs.

Good mechanical stability: Suitable for continuous use and large-scale systems, capable of withstanding prolonged environmental stresses.

Improved environmental quality: Effective removal of hazardous substances helps meet regulatory requirements and protects public health and ecosystems.
