

Wooden Activated Charcoal Adsorbent Powder Industrial For Wastewater Treatment

Our Product Introduction

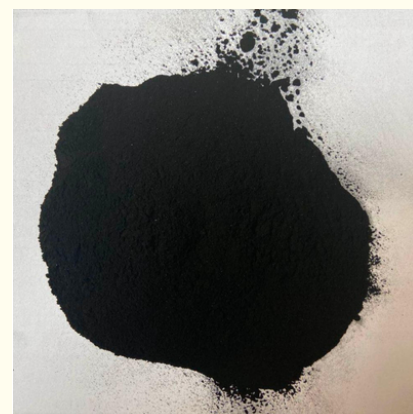

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Activated Charcoal Adsorbent Industrial,
Wooden Activated Charcoal Adsorbent,
Wooden Activated Charcoal For Wastewater
Treatment**

Product Description

Adsorbent Powder From Wooden Activated Carbon / Industrial Wastewater Treatment

Industrial wastewater treatment: wood-based activated carbon is mainly used in industrial wastewater treatment to remove organic pollutants in water and reduce COD (Chemical Oxygen Demand) value to meet the emission standards.

Gas emission treatment: In steel and other industries, wood activated carbon effectively removes sulfur dioxide and nitrogen oxides from sintered flue gas through adsorption process, which plays a positive role in environmental protection.

VOCs treatment: For the low concentration of VOCs (Volatile Organic Compounds) generated by automobile manufacturing, spraying, printing and other industries, wood activated carbon shows good treatment effect and helps to improve the atmospheric quality.

Petrochemical field: wood-based activated carbon is used for decolorization and purification of petrochemical products, removing harmful substances, and as a catalyst or carrier to enhance catalytic efficiency.

Liquid phase adsorption: wood-based activated carbon is used to adsorb impurities and improve product quality in the fields of food and beverage, pharmaceuticals, etc. It is also commonly used in the deep treatment of sewage.
