Product Description

Fine Wood Activated Carbon Powder / Advanced Chemical Decolourants

It is a fine activated carbon powder made from wood that is widely used in various filtration and adsorption applications.

High specific surface area: due to its porous structure, it provides a huge surface area and enhances the adsorption performance.

Excellent adsorption performance: it can effectively adsorb organic compounds, heavy metals and other pollutants in gases and liquids.

Environmentally friendly materials: the use of renewable wood as raw material meets the requirements of sustainable development.

Wide applicability: Suitable for a wide range of applications including water treatment, air purification, pharmaceuticals and food processing.
