Product Description

Wood Based Powdered Activated Carbon / For Wastewater Treatment

It is a type of activated carbon that is specifically derived from wood materials and is in a powdered form. It possesses several advantages due to its unique properties and the source material.

High Adsorption Capacity: The powdered form offers a faster adsorption rate compared to granular activated carbon, as the smaller particles allow for quicker diffusion of molecules into the pores.

Useful in Gas Phase Applications: Volatile Organic Compounds (VOCs) Removal: Wood Based Powdered Activated Carbon is effective at removing VOCs from air, making it useful in air purification systems.

Effective for Water Treatment: Removal of Impurities: Wood Based Powdered Activated Carbon can effectively remove impurities from water, including organic compounds, chlorine, and other contaminants.
