

Wood Derived Pulverized Activated Charcoal For Pollutant Removal

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Wood Derived Pulverized Activated Charcoal, Pollutant Removal Pulverized Activated Charcoal**

Product Description

Wood-Derived Pulverized Activated Carbon / Maximizing Pollutant Removal

Raw materials and characteristics:

High-quality base material: Wood-based activated carbon is usually made from high-quality fuel wood, wood chips, wood briquettes, coconut shells and fruit shells. These materials have a natural cellulose and porous structure, which provides a good basis for manufacturing activated carbon with high adsorption performance.

Well-developed micro porous structure: wood-based activated carbon has a highly developed micro porous structure, which gives it a large specific surface area, thus providing a large number of adsorption sites to effectively capture and adsorb various organic substances and pollutants.
