Wastewater Activated Carbon Charcoal Powder, Clarification Activated Carbon Charcoal Powder

Product Description

High Surface Area Activated Carbon Powder / Wastewater / Clarification

O

Features and Benefits

High specific surface area: up to thousands of square meters per gram, providing more adsorption sites and enhancing adsorption capacity.

Excellent adsorption properties: effectively adsorbs organic compounds, heavy metals and other contaminants from gases and liquids.

Fine particle size: As a powder, it provides a faster adsorption rate because pollutants can more easily reach the surface of the activated carbon.

Wide range of applications: Suitable for use in air and water purification systems, chemical recycling, pharmaceutical and food processing, and many other areas.

Customizability: Its pore size distribution and surface chemistry can be adjusted to meet specific needs.
