Product Description

Eco Pure Wood Activated Carbon / Wastewater Treatment / Air Purifiers

Raw material selection: Raw materials are usually selected from wood by-products of responsible forestry, such as sawdust, wood chips, wood flakes, etc., which are considered to be resources with a low ecological impact.

Purification effect: Due to its high specific surface area and developed pore structure, it has good purification effect and can effectively adsorb impurities in water and harmful gases in air.

Application areas

Widely used in air purifier, drinking water filtration, waste water treatment, chemical recycling, gas purification and industrial desulfurization and denitrification.
