

CAS 64365-11-3 Powder Activated Carbon For Cleaning And Deodorising

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **64365-11-3 Powder Activated Carbon , Deodorising Powder Activated Carbon**

Product Description

Activated Carbon Powders / Activated Carbon For Cleaning And Deodorising

Water treatment : Activated carbon plays an important role in the treatment of tap water, industrial water and electroplating wastewater. It effectively removes organics, chlorides and other impurities from water, ensuring that the water quality meets standards for drinking or industrial use.

Food & Beverage Processing: Activated carbon is used in the decolourisation and refining of products such as sucrose, xylose and mono sodium amalgamate, as well as the deodorisation of fats and oils. It is also widely used in the purification of alcohol and non-alcoholic beverages to effectively remove odors and impurities.

Chemical industry: Activated carbon is used as a catalyst carrier for loading precious metals such as palladium and platinum to participate in the chemical reaction process. It is also used for solvent recovery and gas purification to improve the efficiency of chemical production and environmental protection.

Environmental protection: Activated carbon plays a key role in wastewater treatment and exhaust gas treatment, helping to reduce COD (Chemical Oxygen Demand) and remove bad odours to improve environmental quality.
