

Air Purification Granular Activated Carbon Adsorbent / Chemicals Raw Materials

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Air Purification Granular Activated Carbon,
Granular Activated Carbon Adsorbent,
Air Purification Activated Carbon Adsorbent**

Product Description

Activated Charcoal Pellets / Activated Carbon Adsorbent / Chemicals Raw Materials

Application areas

Water treatment: Activated carbon granules are widely used in water treatment, especially in drinking water treatment and wastewater treatment facilities.

Air purification: activated carbon granules are used in industrial and household air purifiers to adsorb harmful airborne gases such as fumes, VOCs (volatile organic compounds) and odours to improve air quality.

Petrol and solvent recovery: Recovering petrol and solvents through activated carbon not only saves energy but also protects the environment. Activated carbon captures these substances and then recycles them through a desorption process, which is widely used internationally.

Food processing: In the food industry, activated carbon is used to remove colours and flavours, as well as to remove unwanted impurities, ensuring food safety and compliance with required standards.
