

Eco Pure Wood Granular Activated Carbon High Concentration Clean Activated Carbon

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Eco Granular Activated Carbon,
Wood Granular Activated Carbon,
High Concentration Clean Activated Carbon**

Product Description

Eco Pure Wood Activated Carbon / Clean High Concentration Activated Carbon

Raw material selection: Raw materials are usually selected from wood by-products of responsible forestry, such as sawdust, wood chips, wood flakes, etc., which are considered to be resources with a low ecological impact.

Production process: The production process minimizes the use of chemicals or uses environmentally friendly activation methods, such as physical activation, to reduce the negative impact on the environment.

Purification effect: Due to its high specific surface area and developed pore structure, it has good purification effect and can effectively adsorb impurities in water and harmful gases in air.

Applications: Widely used in air purifier, drinking water filtration, waste water treatment, chemical recycling, gas purification and industrial desulfurization and denitrification.

Renewable use: Like other activated carbons, it can be regenerated by appropriate methods to restore its adsorption capacity and improve the economy of use and environmental friendliness.
