Product Description

Coal Granular Activated Carbon / Efficient Odour Control / Black

Particles:

High Surface Area: Carbon granules have a large surface area per unit weight, which allows them to adsorb a significant amount of material.

Porosity: The porous structure of carbon granules provides many sites for adsorption.

Chemical Stability: They are stable under a wide range of conditions, making them suitable for various applications.

Adsorption Capacity: They can adsorb a variety of organic compounds, gases, and impurities from both liquids and gases.

Application areas

Water Purification: Used in water filters to remove impurities like chlorine, pesticides, and industrial pollutants.

Air Filtration: In air purifiers to remove pollutants, odors, and harmful gases.
