## Product Description

Activated Carbon Pollutant Remover / Waste Gas Treatment / Clarification

### Application Fields:

**Water treatment:** In the field of water treatment, activated carbon is used to remove organic pollutants, residual chlorine, odours and colours from water. For example, activated carbon filtration is often used in household water filters and industrial wastewater treatment systems.

**Chemical spill response:** In chemical leaks or spills, activated carbon is used for emergency containment and cleanup to limit the spread of hazardous substances.

**Soil remediation:** In soil remediation projects, activated carbon is used to adsorb heavy metals and other toxic substances from the soil to reduce their impact on the environment and human health
