

## Industrial Black Activated Carbon Adsorbent Water Filtration Chemical Production

### Our Product Introduction

#### Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

#### Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Black Activated Carbon Adsorbent,  
Activated Carbon Adsorbent Water Filtration**

## Product Description

Industrial-Strength Carbon Adsorbent / Chemical Production / Filtration

### Application Areas:

**Water treatment:** industrial grade activated carbon is used in drinking water, industrial water and wastewater treatment for deep purification, removing organic pollutants, heavy metals, residual chlorine and colours to ensure that water quality meets standards.

**Air purification:** In industrial environments, activated carbon is used to remove harmful gases, odours and volatile organic compounds (VOCs) from the air, improving the working environment and the quality of emissions.

**Chemical purification:** In chemical production, activated carbon is used to purify chemicals, remove impurities and unwanted by-products, and improve product quality.

**Gas separation:** Industrial grade activated carbon is used in the petrochemical industry for the separation, purification and purification of gases, such as alkali-free deodorisation and ethylene desalination water treatment.

**Hong Kong Xinyue Activated Carbon Limited**
