

Purifying Wastewater Treatment Activated Carbon Charcoal For Odour Removal

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight:
 - Purifying Wastewater Treatment Activated Carbon
 - , Wastewater Treatment Activated Carbon Charcoal
 - , Purifying Activated Charcoal For Odour Removal

Product Description

Purifying Activated Carbon For Wastewater Management / Remove Odours

Application areas

Adsorption of pollutants: activated carbon has a high adsorption capacity, which can effectively adsorb organic substances, heavy metal ions, pigments, odorous substances and other pollutants in the wastewater, so as to improve the water quality of the wastewater.

Decolourisation: For wastewater containing pigment, the adsorption effect of activated carbon can effectively remove the pigment and make the wastewater clear and transparent. This is especially important for some industrial wastewater treatment that requires colour removal.

Remove odour: The porous structure of activated carbon gives it a strong ability to adsorb odour. Therefore, when treating wastewater containing odorous substances, activated carbon can effectively remove odours and improve the sensory quality of the wastewater.
