

Odour Colour Removal Wastewater Treatment Activated Carbon Charcoal Particles

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight:
 - Colour Removal Wastewater Treatment Activated Carbon
 - ,
 - Odour Removal Wastewater Treatment Activated Carbon
 - ,
 - Wastewater Treatment Activated Charcoal Particles

Product Description

Particles Of Activated Carbon For Wastewater Treatment / Air Purifiers

Activated carbon particles have a large specific surface area and a rich pore structure, which enables them to effectively adsorb organic matter in wastewater, such as dissolved organic matter, volatile organic matter and dyes. Through adsorption, activated carbon particles can significantly remove these pollutants from wastewater, thereby improving water quality.

Activated carbon granules also remove odour and colour from wastewater. It adsorbs volatile organic compounds (VOCs) and pigment particles from wastewater, thereby reducing odour and colour in the water, resulting in a significant organoleptic improvement in the wastewater

Activated carbon particles also have a detoxifying effect in wastewater treatment. It can adsorb toxic substances in wastewater and reduce their harm to the environment and organisms.
