

Domestic Municipal Activated Carbon Water Purification High Removal Effect

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: Domestic Activated Carbon Water Purification, Municipal Activated Carbon Water Purification

Product Description

Activated Carbon Water Purification Technology / High Removal Effect

Application areas

Domestic water purification: In domestic water purification systems, activated carbon is used in filter jugs, water purifiers and other devices to remove residual chlorine, odours and harmful organics from tap water, ensuring safe and palatable drinking water.

Municipal Water Treatment: In municipal water treatment plants, activated carbon is used to further purify water that has already undergone preliminary treatment, and is particularly effective when dealing with seasonal increases in organic pollution loads (e.g., algal bloom season).

Activated carbon treatment effectively removes organic contaminants from the water and improves the safety and stability of the water supply.

Industrial Wastewater Treatment: In the industrial sector, activated carbon can be used not only for wastewater treatment to remove harmful substances and meet discharge standards, but also for the deep treatment of water reuse systems, helping companies to save water and reduce environmental pollution.

Emergency water treatment: In the event of natural disasters such as floods or accidental water pollution, activated carbon can be quickly put into use as an emergency treatment technology to provide surface treatment for large water sources and effectively guarantee the safety of drinking water.
