

## Effective Wastewater Treatment Activated Carbon Pillars Wood For Decolourisation

### Our Product Introduction

for more products please visit us on [activatedcarbon-charcoal.com](http://activatedcarbon-charcoal.com)

#### Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

#### Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight:
  - Decolourisation Wastewater Treatment Activated Carbon
  - , Wood Wastewater Treatment Activated Carbon
  - , Decolourisation Activated Carbon Pillar

## Product Description

### Wastewater Treatment Grade Wood Activated Carbon Pillars / Decolourisation

#### Application areas

**Adsorption of pollutants:** The main function of the wastewater treatment grade wood activated carbon column is to adsorb organic pollutants, heavy metals and other harmful substances in wastewater through its large surface area and high porosity. This adsorption can significantly reduce the concentration of pollutants in wastewater to meet environmental discharge standards.

**Removal of odours and colours:** activated carbon columns also have a good effect on the removal of odorous substances and colours in wastewater. They can adsorb and immobilise these substances, thus improving the odour and appearance of the wastewater and the reuse value of the wastewater.
