

Industrial Wastewater Treatment Activated Carbon High Performance Coal Activated Charcoal

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: Industrial Wastewater Treatment Activated Carbon
, Coal Wastewater Treatment Activated Carbon,
High Performance Coal Activated Charcoal

Product Description

Dark Purity Coal Carbon / High Performance In Industrial Water Treatment Control

Energy sector: As a variant or refined product of coal, it may be used for efficient and clean energy production. High purity carbon means higher energy density and fewer impurities, which may improve combustion efficiency and reduce pollutant emissions.

Materials Science: High purity carbon has a wide range of applications in materials science. It can be used to make high-performance electrode materials such as electrodes for lithium-ion batteries and supercapacitors. In addition, it can be used as a raw material for the preparation of advanced carbon materials (e.g. carbon fibres, carbon nanotubes, etc.).

Chemical industry: In the chemical industry, it can be used as a carrier or component of catalysts to improve the activity and selectivity of chemical reactions. Also, due to its high purity, it can be used in the preparation of high-purity chemicals.

Metallurgical industry: In the metallurgical industry, it may be used as a reducing agent to help extract metals from ores. Its high purity means that the reduction process is purer, reducing the effect of impurities on the final product.
