

Activated Charcoal Pellets For Removing Pollutants And Odors In Water And Air

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Water Activated Charcoal Pellets,
Air Activated Charcoal Pellets,
Pollutants Activated Charcoal Pellets**

Product Description

Activated Charcoal Pellets for Removing Pollutants and Odors in Water and Air

Activated charcoal pellets are a highly effective solution for removing pollutants and odors in both water and air.

In water treatment, these pellets work by adsorbing a wide range of contaminants such as pesticides, herbicides, heavy metals, and organic compounds. The large surface area of the activated charcoal provides numerous adsorption sites, allowing it to effectively trap and remove these impurities. This results in cleaner, safer water for drinking, cooking, and other uses.

For air purification, activated charcoal pellets are equally efficient. They can absorb odors, volatile organic compounds (VOCs), and other airborne pollutants. Whether it's removing unpleasant smells from a kitchen, bathroom, or industrial setting, or reducing harmful substances in the air we breathe, these pellets offer a reliable and natural solution.
