

Activated Charcoal Pellets Cleansing Agents For Pure Environments

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Pure Environments Activated Charcoal Pellets, Cleansing Agents Activated Charcoal Pellets**

Product Description

Activated Charcoal Pellets Cleansing Agents For Pure Environments

Activated charcoal pellets serve as remarkable cleansing agents for achieving pure environments.

These pellets are engineered to possess exceptional adsorption properties. In the realm of air purification, they work tirelessly to capture and hold onto a wide variety of pollutants, including dust, pollen, allergens, and volatile organic compounds (VOCs). By doing so, they transform the air we breathe into a cleaner and healthier medium.

When it comes to water purification, they have the ability to remove impurities such as chlorine, heavy metals, pesticides, and organic contaminants. This results in water that is not only safe for consumption but also has a better taste and odor.

The pellets are easy to use and can be integrated into various filtration systems or used as standalone purifiers. Their durability and long service life make them a cost-effective choice for maintaining pure environments.
