Our Product Introduction

Product Description

Wood Powder activated carbon for sewage filtration and gas treatment

Wood powder activated carbon is a highly effective solution for both sewage filtration and gas treatment. Derived from natural wood sources, it offers a sustainable and efficient approach to addressing these environmental challenges.

In sewage filtration, wood powder activated carbon plays a crucial role in removing contaminants and impurities. Its porous structure and large surface area allow it to adsorb a wide range of pollutants, including organic compounds, heavy metals, and pesticides. By effectively filtering out these substances, it helps to improve the quality of treated sewage and protect the environment.
