

Wood Based Activated Carbon Pellets Solution For Environmental Contaminant Capture

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Environmental Contaminant Capture Activated Carbon Pellets**
, Environmental Contaminant Capture Pellets,
Wood Based Activated Carbon Pellets

Product Description

Wood Based Activated Carbon Pellets Solution For Environmental Contaminant Capture

Our wood based activated carbon pellets offer a powerful solution for capturing environmental contaminants. Crafted from high-quality wood materials, these pellets are designed to be highly effective in adsorbing a wide range of pollutants.

The pellets have a large surface area and porous structure, which enables them to attract and hold onto contaminants such as heavy metals, volatile organic compounds (VOCs), and other harmful substances. This helps to purify the air, water, and soil, reducing the negative impact of environmental pollution.

In addition, they are made from sustainable materials and can be easily recycled or disposed of in an eco-friendly manner.

Whether you are dealing with industrial emissions, wastewater treatment, or air purification, our wood based activated carbon pellets provide a reliable and efficient solution. They can be used in a variety of applications, including filters, reactors, and adsorption systems.
