Product Description

Acide Washed Anthracite Wood Based Powder Extruded Activated Carbon

This acid-washed anthracite wood based powder extruded activated carbon is a highly effective and specialized product. It combines the strength of anthracite coal with the natural properties of wood to offer exceptional adsorption capabilities.

The acid washing process further enhances the purity and performance of the activated carbon. It removes impurities and residual substances, resulting in a cleaner and more efficient material.

The powder form allows for easy integration into various applications. It can be used in filtration systems, water treatment plants, air purification devices, and industrial processes. The extruded nature gives it a consistent shape and size, ensuring optimal flow and contact with the target substances.
