

Industrial Waste Gases Vap Removal Extruded Pellet Activated Carbon

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Extruded Pellet Activated Carbon,
Industrial Waste Gases Activated Carbon**

Product Description

Industrial Waste Gases Vap Removal Extruded Pellet Activated Carbon

Extruded pellet activated carbon is a highly effective solution for removing vapors from industrial waste gases. This specialized form of activated carbon is designed to handle the complex challenges of industrial emissions.

The extruded pellet structure provides several advantages. It offers a high surface area for adsorption, ensuring efficient capture of harmful vapors.

The pellets are also highly durable and resistant to abrasion, making them suitable for use in demanding industrial environments.

With its ability to target a wide range of pollutants, including volatile organic compounds (VOCs), odors, and toxic gases, extruded pellet activated carbon helps to improve air quality and protect the environment. It can be integrated into various industrial waste gas treatment systems, such as scrubbers, filters, and adsorption towers.
