

## Carbon Flue Gas Treatment Wood Based Activated Carbon For Water Treatment

### Our Product Introduction

#### Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

#### Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Wood Based Activated Carbon,  
Water Treatment Wood Based Activated Carbon**

## Product Description

### Carbon Flue Gas Treatment Wood Based Activated Carbon For Water Treatment

Activated carbon is a powerful tool for carbon flue gas treatment. It offers an effective and environmentally friendly solution to address the challenges of flue gas emissions.

When used in carbon flue gas treatment, activated carbon has the ability to adsorb a wide range of pollutants and contaminants. It can capture harmful substances such as sulfur dioxide, nitrogen oxides, heavy metals, and particulate matter.

The porous structure of activated carbon provides a large surface area for adsorption, allowing it to efficiently remove these pollutants from the flue gas stream. This not only helps to reduce air pollution but also meets regulatory requirements for emissions control.

In addition to its pollutant removal capabilities, activated carbon is also reusable. After adsorption, it can be regenerated through thermal or chemical processes, restoring its adsorption capacity and extending its lifespan.
