

Coal Based Granular Activated Carbon For Water And Air Purification In Water Treatment

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Air Purification Granular Activated Carbon,
Coal Based Granular Activated Carbon,
Water Treatment Granular Activated Carbon**

Product Description

Coal Based Granular Activated Carbon for Water and Air Purification in Water Treatment

In chemical processing, it plays a crucial role in removing impurities and contaminants from raw materials and intermediates. Its high adsorption capacity enables it to capture unwanted substances, ensuring the purity and quality of the final products.

For purification purposes, this granular activated carbon is ideal for treating waste streams and effluents. It can adsorb harmful chemicals, dyes, and heavy metals, reducing the environmental impact of chemical processes.

The granular form of this activated carbon offers several advantages. It provides a larger surface area for adsorption compared to powdered forms, while still being easy to handle and use in filtration systems.

With its durability and long service life, this granular activated carbon is a cost-effective choice for chemical processing and purification applications. It can withstand harsh chemical environments and maintain its adsorption properties over an extended period.
