

## Outstanding Granular Activated Carbon For Chemical Purification And Refinement

## **Basic Information**

• Place of Origin: Datong, Shanxi, China

Brand Name: XinyueMinimum Order Quantity: 1 Ton

Packaging Details: 500kg/bag, 25kg/bag

• Payment Terms: T/T

• Supply Ability: 100,000 Ton/Tons per Year

## **Product Specification**

CAS No: 64365-11-3
Purity: 99.99%
Type: Adsorbent
Iodine Number: 800-1200mg/g

Ash: <12</li>Moisture: <5%</li>EINECS No: 264-846-4

• Package: 500kg/bag Or 25kg/bag

• Hardness: >95%

Highlight: Chemical Purification Granular Activated

Carbon

, Chemical Granular Activated Carbon

## **Product Description**

Outstanding Granular Activated Carbon for Chemical Purification and Refinement

In chemical purification, it demonstrates exceptional adsorption capabilities, efficiently removing impurities, contaminants, and unwanted substances from chemical compounds. Its high purity and selectivity ensure that only the desired components are retained, resulting in superior quality end products.

For refinement processes, this granular activated carbon plays a crucial role in enhancing the properties and performance of chemicals. It can improve color, clarity, and stability, as well as remove odors and off-flavors. Its fine particle size and uniform distribution allow for optimal contact with the chemicals being refined.

The granular form of this activated carbon offers several advantages. It provides a large surface area for adsorption, while still being easy to handle and use in various purification and refinement systems. It also has good mechanical strength and resistance to abrasion, ensuring long-term durability.
