

Pure Activated Carbon With High Adsorption Capacity / Water Treatment

Basic Information

- Place of Origin:
- Datong, Shanxi, China

Xinyue

- Brand Name:
- Minimum Order Quantity:
- Packaging Details: 500kg/k
- Payment Terms:
- Supply Ability:
- 1 Ton
- 500kg/bag , 25kg/bag
- T/T
- 100,000 Ton/Tons per Year

Water Treatment Activated Carbon, High Adsorption Capacity Activated Carbon

Product Specification

 Highlight: 	Pure Activated Carbon,
 Hardness: 	>95%
Package:	500kg/bag Or 25kg/bag
EINECS No:	264-846-4
 Moisture: 	<5%
• Ash:	<12
Iodine Number:	800-1200mg/g
• Type:	Adsorbent
• Purity:	99.99%
CAS No:	64365-11-3

Our Product Introduction

Product Description

Pure Activated Carbon with High Adsorption Capacity / Water Treatment

When it comes to chemical purification, it stands out with its remarkable ability to attract and hold onto impurities, contaminants, and unwanted elements within chemical mixtures. Its high selectivity and purity ensure that only the essential components remain, leading to products of exceptional quality.

In the process of refinement, this granular activated carbon shines brightly. It can enhance the color, transparency, and stability of chemicals, while also eradicating unpleasant odors and off-flavors. The fine and evenly distributed particles offer optimal contact with the substances being refined, maximizing its effectiveness.

The granular structure brings several advantages. It presents a large surface area for adsorption, yet is conveniently handled and incorporated into different purification and refinement setups. Additionally, it boasts good mechanical strength and resistance to wear and tear, guaranteeing long-lasting durability.
