

Organic Compound Removal With Coal Based Powder Activated Carbon

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: Organic Compound Removal Powder Activated Carbon
, Organic Compound Removal Activated Carbon
, Coal Based Powder Activated Carbon

Product Description

Organic Compound Removal With Coal Based Powder Activated Carbon

This coal based powder activated carbon is a highly effective solution for removing organic compounds.

With its excellent adsorption properties, it can capture a wide range of organic contaminants present in water, air, and industrial processes. Whether it's volatile organic compounds (VOCs), pesticides, pharmaceuticals, or other harmful organics, this activated carbon powder gets the job done.

The coal based material provides durability and a large surface area for adsorption. It can be easily integrated into filtration systems or used in batch processes to treat contaminated media.

By removing organic compounds, this activated carbon powder helps to improve environmental quality and protect human health. It is an essential tool for industries such as water treatment, air purification, and chemical manufacturing.
