

Black Activated Carbon Powder Material For Water Treatment And Industry

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Purity: 99.99%
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Black Activated Carbon Powder,
Industry Activated Carbon Powder,
Water Treatment Activated Carbon Powder**

Product Description

Black Activated Carbon Powder Material For Water Treatment And Industry

This powder is known for its intense black color, which gives it a distinct and recognizable appearance. The black hue is a result of the activation process that enhances its adsorption capabilities.

The activated carbon powder is highly porous, providing a large surface area for the adsorption of various substances. It can effectively remove impurities, odors, and contaminants from air and water.

With its excellent adsorption properties, this black activated carbon powder material is widely used in industries such as water treatment, air purification, and chemical processing. It can also be found in household products like air fresheners and water filters.

The material is durable and long-lasting, ensuring reliable performance over an extended period. It is easy to handle and can be added to filtration systems or used in various applications as needed.
