

Activated Carbon For High End Water Treatment Systems / Filtered Water

Basic Information

• Place of Origin: Datong, Shanxi, China

Brand Name: XinyueMinimum Order Quantity: 1 Ton

Packaging Details: 500kg/bag , 25kg/bag

• Payment Terms: T/T

• Supply Ability: 100,000 Ton/Tons per Year

Product Specification

CAS No: 64365-11-3
Type: Adsorbent
Iodine Number: 800-1200mg/g

Ash: <12Moisture: <5%EINECS No: 264-846-4

• Package: 500kg/bag Or 25kg/bag

• Hardness: >95%

Highlight: Activated Carbon For Water Treatment Systems

, Activated Carbon For Filtered Water

Product Description

Activated Carbon for High end Water Treatment Systems / Filtered Water

This activated carbon is characterized by its highly porous structure, which provides a large surface area for effective adsorption. It can efficiently remove various impurities, contaminants, and organic substances from water, including chlorine, pesticides, herbicides, volatile organic compounds (VOCs), and unpleasant odors and tastes.

The product is manufactured using advanced activation techniques to ensure optimal pore size distribution and adsorption capacity. It offers excellent mechanical strength and stability, allowing for long service life and reliable performance in water treatment processes.

With its high adsorption efficiency and purification capabilities, "Activated Carbon for High-end Water Treatment Systems" is ideal for applications in industries such as pharmaceuticals, electronics, food and beverage, and high-end residential water treatment.
