## Product Description

### Wastewater Treatment Activated Carbon Remove Harmful Substances Odour

This specialized activated carbon is engineered with a unique porous structure that provides a large surface area for adsorption. It has the ability to attract and trap a wide range of contaminants, including organic compounds, heavy metals, pesticides, and pharmaceuticals, effectively reducing their concentration in the wastewater.

In addition to removing harmful substances, Wastewater Treatment Activated Carbon is highly efficient in eliminating unpleasant odors. It can adsorb odor-causing molecules, such as sulfur compounds and volatile organic compounds (VOCs), leaving the treated water with a fresher and more pleasant smell.
