

Industrial Activated Carbon For Purifying Chemicals In Pharmaceutical Industry

Our Product Introduction

for more products please visit us on activatedcarbon-charcoal.com

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Industrial Activated Carbon,
Industrial Activated Carbon For Purifying
Chemicals**

Product Description

Industrial Activated Carbon For Purifying Chemicals In Pharmaceutical Industry

This high-quality activated carbon is crafted with precision to ensure exceptional adsorption capabilities. It effectively removes impurities, contaminants, and unwanted substances from various chemicals used in the pharmaceutical manufacturing process. By doing so, it helps enhance the purity and quality of the final pharmaceutical products, ensuring their safety and efficacy.

The activated carbon is characterized by its large surface area and highly porous structure, which provide numerous adsorption sites for the targeted chemicals. This allows for efficient purification and the removal of even trace amounts of impurities that could potentially affect the quality and performance of the pharmaceuticals.

It is manufactured using advanced techniques and undergoes strict quality control measures to guarantee consistent performance and reliability. Additionally, it is resistant to chemical degradation and has a long service life, making it a cost-effective solution for pharmaceutical companies.
