

## Wastewater Treatment Activated Carbon For Purification And Odor Removal

### Our Product Introduction

#### Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

#### Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: Wastewater Treatment Activated Carbon,  
Purification Activated Carbon,  
Odor Removal Activated Carbon

## Product Description

### Wastewater Treatment Activated Carbon for Purification and Odor Removal

This activated carbon has a highly porous structure that provides a large surface area for adsorption. It can effectively adsorb a wide range of contaminants, including organic compounds, heavy metals, and pesticides, from the wastewater. By removing these impurities, the activated carbon helps to improve the quality of the treated water, making it suitable for reuse or discharge into the environment.

In addition to purification, this activated carbon is also highly effective in removing odors from wastewater. It can adsorb odor-causing molecules, such as volatile organic compounds (VOCs) and sulfur compounds, thereby reducing or eliminating unpleasant odors. This is particularly important for wastewater treatment facilities located in populated areas or near sensitive receptors.
