

Activated Carbon For Agricultural Wastewater Treatment Purify Water Remove Impurities

Our Product Introduction

Basic Information

- Place of Origin: Datong, Shanxi, China
- Brand Name: Xinyue
- Minimum Order Quantity: 1 Ton
- Packaging Details: 500kg/bag , 25kg/bag
- Payment Terms: T/T
- Supply Ability: 100,000 Ton/Tons per Year

Product Specification

- CAS No: 64365-11-3
- Type: Adsorbent
- Iodine Number: 800-1200mg/g
- Ash: <12
- Moisture: <5%
- EINECS No: 264-846-4
- Package: 500kg/bag Or 25kg/bag
- Hardness: >95%
- Highlight: **Water Purify Activated Carbon,
Agricultural Wastewater Treatment Activated Carbon**

Product Description

Activated Carbon for Agricultural Wastewater Treatment Purify Water Remove Impurities

Agricultural wastewater often contains a variety of contaminants such as pesticides, fertilizers, sediments, and organic matter. Activated carbon plays a crucial role in treating this wastewater by adsorbing these impurities and improving water quality.

The porous structure of activated carbon provides a large surface area for adsorption. It can attract and hold onto contaminants, including organic compounds, heavy metals, and suspended solids. This helps to reduce the levels of pollutants in the water and make it safer for reuse or discharge.

One of the key advantages of using activated carbon for agricultural wastewater treatment is its versatility. It can be used in different treatment processes, such as filtration systems or as a part of advanced treatment technologies.
